MST'S CARBON DIOXIDE (CO₂) FILTER SYSTEM

Is Carbon Dioxide (CO₂) a nuisance?..... MST has a solution!

MST now offers a Carbon Dioxide Removal Filter to help reduce nuisance levels of Carbon Dioxide found in Compressed Breathing Air.

Air being compressed by industrial compressors normally intake air from inside factories or other areas that are contaminated with Carbon Dioxide. Normally, the CO₂ levels are at acceptable levels for breathing, however, in certain situations (eg. welding operations, internal combustion traffic or various types of gas fired equipment) CO₂ can be a nuisance.

Features and Benefits

High Efficiency CO₂ Filter Media.

Fast, Easy Cartridge Change.

Spring-Loaded Cartridge Packs Avoid Media Channeling.

Low System Pressure Drop - Designed to a Maximum of 5 PSI Pressure Drop at Maximum Rated Flow.

Easily Adapts to Existing Piping Configurations and by Using Bypass Valve Arrangements, Can Be Utilized Only When Conditions Require CO₂ Removal to Extend Filter Media Life.

MST reserves the right to modify or discontinue products at any time.
